1. The following is an examiner's statement of reasons for allowance: The claims have been allowed because claim 1 recites an apparatus for delivering coupons. The coupons are a continuous web and are connected. There is an infeed assembly having an upper and a lower infeed belt of which a biased linkage connects the belts to one another so as to accommodate three-dimensional coupons. There is a delivery assembly having upper and lower delivery belts and are connected to each other by a biased linkage. There is a controller having a coupon staging sensor to sense coupons between the infeed and the delivery assembly . Claim 13 recites the essential matter of claim1 but without the controller mechanism. There is also a guide track in which one movable infeed belt travels and in which one movable delivery belt travels.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Dimauro is cited showing in figure 2 a dispenser having a continuous web of material and delivered to a cutting device.
